### Associations

This deck of *Pair-Ups: Associations* targets common associations among everyday items, such as a *toothbrush* and *toothpaste*. There are 26 pairs of associated objects in this deck.

At first, present up to six pairs of associated cards at a time and make sure your students can label them and match them appropriately. As your students identify correct matches, model complete sentences that explain the association between the two cards, such as *A toothbrush goes with toothpaste because we put toothpaste on a toothbrush to brush our teeth*. Then use these cards to play games requiring matching pairs of cards, such as Go Fish and Memory.

Use your own judgment about the complexity of the response to require from your students, depending on their expressive language skills.

1

toothbrush

2

toothpaste

3

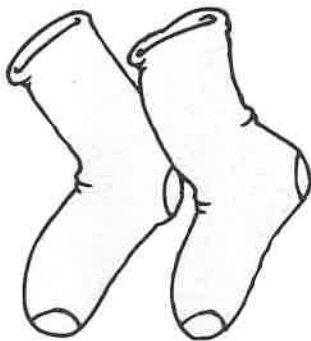

peanut butter

4

jelly

5

socks

6

shoes

7

cereal

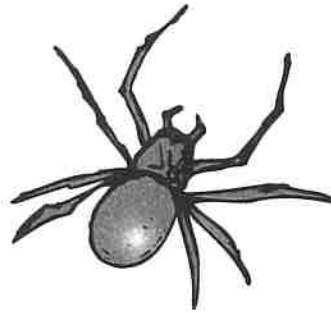

8
