Why

This deck of *Pair-Ups: Why?* targets asking and answering *why* questions. There are 26 pairs of *why* cards. Each pair consists of a *why* question card and a matching answer card, such as *Why does a bird build a nest?* (*To lay eggs in*).

At first, present up to six pairs of *why* question and answer cards at a time. Make sure your students can label them and match them appropriately. As your students identify correct matches, model the *why* questions on the cards. Then use the cards to play games requiring matching pairs of cards, such as Go Fish and Memory.

Use your own judgment about the complexity of the responses to require from your students, depending on their expressive language skills.
